A FEW WORDS FROM YOUR SOCIETY PRESIDENT

A few words from your Society president, During your pursuit and collection of genealogy records and / or family history facts an occasional review of research

techniques is always a good idea. The Arlington Public Library (APL) genealogy reference collection of 6000 plus titles on library shelves at NE Branch do not circulate, however the APL has a good cross section of genealogy “how-to-books” to choose from that do check out. Two books often recommended are: Emily Ann Croom’s *Unpuzzling Your Past*, fourth edition republished in 2010, and George G. Morgan’s *How To Do Everything: Genealogy*, fourth edition updated and republished 2015. For a better understanding, try to check out both books at the same time. Then browse the contents and index pages to find the topics you’d like to focus on during your review. For example, Morgan’s book has a short but very informative chapter about DNA and its place in genealogy research.

Our publicity committee chair, Ruth Goodman, gave us notice at the 18 March Board meeting that she will be editing her last AGS Newsletter with the June issue. Ruth took up the editor job from Tom Cogdell in 2013. On behalf of the Society and its members, Thank you Ruth, for your dedication and hard work over the past four years. Our Society is now in need of a volunteer to publish the AGS Newsletter. Ruth will work with the new editor over the summer season to ensure a smooth transition. Please contact Ruth directly, or any board member, if you are interested in volunteering.

The special bylaws committee chaired by Dorothy Rencurrel, was activated at the 7 January Board meeting. A bylaw change to our current membership renewal dates is in the works. In essence the membership renewal date will change to match our financial year which is the calendar year. If approved by two thirds vote at the May or June meeting your membership will be extended through December 2017 with renewal due in January 2018.

As per the bylaws, officer elections are scheduled for the June Members meeting. The special nominating committee was

activated at the 18 March Board meeting with Sylvia Hoad as Chair and Jeanne Rives as the second board member. The bylaw calls for a third committee member from the membership. If you are interested in volunteering for the nominating committee, please contact Sylvia, or Jeanne, or any officer on the board. Any member in good standing is eligible to be nominated for an office. If you decide to nominate a member for office, please get the consent of the nominee in advance. The committee will announce a slate of nominees at the May members meeting.

Two projects, both currently under the purview of the board, an AGS Informational Video and AGS on Facebook.com, are in need of a volunteers. Please contact any board member if you are interested in helping your society enhance its presence in social media.

The next AGS Board meeting is scheduled for Saturday morning, April 29th, in the Lake Arlington Branch Library community room. Society members are always invited to participate by attendance or by sharing your ideas with a board member. Following the March meeting our membership count was in the mid-sixties. See you next Tuesday evening at the April 11th member meeting.

Elephind can be a great **FREE** resource for anyone who wishes to search old newspapers. The purpose of elephind.com is to make it possible to search all of the world's digital newspapers from one place and at one time. Elephind.com allows you to simultaneously search across thousands of articles using key words and phrases.

Elephind presently contains 174,143,178 items from 3,306 newspaper titles. You can find a list of libraries that have contribute their archives on the site by clicking on "List of Titles." It is a very long list! Clicking on any library's name displays the newspapers in that collection.

Elephind.com is much like Google, Bing, or other search engines but focused only on historical, digitized newspapers. By clicking on the Elephind.com search result that interests you, you'll go directly to the newspaper collection which hosts that story.

Of course, newspapers can be a great resource of genealogy information. Birth announcements, marriage announcements, court news, and more can be searched within seconds. If your ancestor was a merchant,

you probably can also find his or her advertisements placed in the newspaper.

TIMELY GENEALOGY ORGANIZATION TIPS

3/30/2017 By Vanessa Wieland

Try this: take a 10-minute break after every 30 minutes. Figure out what you want to accomplish in that 30 minutes, and that way, once you've completed it, you'll enjoy a sense of accomplishment. Even if you don't, you can walk away after 30 minutes without guilt, because you're making progress.

1. Make an inventory.

Create a list or set of stacks of your paperwork. What do you have? Where does it currently live? **Bonus:** you may find while you're doing this that you start to see patterns, holes in your research, and inspiration for new research crop up during this process.

2. Determine the organization system that best works for you.

Try to keep it as simple as possible.

Determining your organization system might take a bit of self-reflection. Are you consistently organized or is your office a bit messy? How often do you work on your research? And what are your needs? You'll also want to factor in space, access, preservation and funds.

3. Sort your work into your organization system.

This is where that timer will really come in handy. You can tackle this a variety of ways, but here are some possible solutions to accomplishing items in your time frame:

- by branch/family (maternal and paternal)
- by surname
- by person
- by record
- by research question or log
-

4. Keep narrowing down your goal.

Narrow your goal until you have a target you can easily achieve.

5. Keep a research log or to-do list.

Track your research as you go to write down steps and things you may want to investigate. Don't let yourself get sidetracked. Write it down, then you can revisit it later. Facebook reader Jennifer Till advises, "Resist the urge to write on random scraps of paper--get a notebook with some kind of binding and carry it with you for all those random research thoughts."

The Difference Between Wills and Probate Documents

When you are doing genealogy, you will most likely eventually go into court records and look for the wills of your ancestors. Wills can have a huge amount of previously unknown genealogical information in them. You can confirm relationships with them, learn new relationships, and get an idea of the lifestyle of your ancestor by looking at the money they're giving away and the belongings they are assigning to various relatives. People have been making wills for centuries, so it's not a new thing. You will even find wills dating from the early middle

ages, and sometimes even earlier. The will of Cecily Neville in 1495 in England, for example, includes one of the earliest mentions of her then four-year-old great-grandson, the future **King Henry VIII**.

Since wills have been around for so long, the chances of you finding one for your ancestor is good. Not everyone made a will, though. If someone died without a will, they were considered to be "intestate." If they had heirs and anything of value, an inventory of their estate may have been taken instead of a will, and an executor of their estate appointed by the court. The inventory, declaration of executor, and all financial information concerned with the solvency or lack thereof of the estate are together known as the probate documents.

While there is not always a will in the probate documents, this does not mean there isn't a lot of good information on your ancestors in those documents. As an example, one ancestor of mine did not have a will, but the probate documents of his estate named a court-appointed executor. The name of the executor proved an important family relationship, as this ancestor had four confirmed sons, but there was a fifth male in the family who was always listed as the son of this ancestor's brother in **census records**, but as the ancestor's son in personal family records. The mystery fifth son's appointment as executor of the estate in probate documents proved the personal family records were right and the census records were not.

If you have always wondered if there are any family photos for a branch of your family, you may discover this in probate records, if photographs are included in the estate's inventory list. Then, you will have an avenue to explore for finding them by researching the line of the various children of the family who may have gotten them after the court was done probating the estate. You can tell if your ancestor was well-off or not from the monetary pages of probate

documents. You will also see a list of people to whom they owe money and who owe money to them. These people can offer clues as to other potential family relationships.

Without a will, the court has to decide on the disposition of someone's estate, under the guidance of the executor. It can take months, or sometimes years, to probate an estate, depending on how extensive it was. The longer it took for the estate to go through probate, the more papers will be in the file, and the more information you will find on the life of your ancestor and how he or she lived it.

In the last week our State lost two of its most prominent Masons, and in their passing away, not only the state but the fraternal orders mourn their loss, but our own "Home for Aged Masons" will feel it more keenly than ever, since they were members of the Board of Grand Trustees and had been in the Home so many times. Their association with these good men meant so much to Supt. W. J. Brown and family, also the officers and members of the Home. Bro. **D. S. McMillen** of Whitewright P.G.H.P. and Bro. **B. K. Hawkins** P.G.H.P. of Grand Royal Arch Chapter of Texas, passed away and was laid to rest in their home towns by the Grand Chapter of Texas. Mr. and Mrs. W. J. Brown attended both funerals. Dr. D. N. Arlington Kid Flyers

(picture of two boys in flying gear)

The above picture is one of our own boys, the son of Mr. and Mrs. Clarence Wright and his chum, Frank Malone, of Dallas. We feel that Colonel Charles Lindbergh has two imitators who are believed to be two of the youngest air students in the country, and we congratulate James Harold Wright and Frank Malone on the wonderful achievements they are making.

They both registered at the new Curtiss-Wright school between Dallas and Fort Worth last week. Each has received several hours of instruction. They are shown in the photo above, rigged up in the standard flying garments, ready for a holiday flight. On the left is James Harold Wright of Arlington, 12 years old. At his side is Frank Malone of 4645 Travis street, 13 years old. Their instructors describe them as being extremely apt students.

Friday February 21, 1930 CURTISS – WRIGHT FLYING SERVICE

Our Manager, W. A. (Tex)

Bohannon is in St. Louis for about two weeks attending the National Aeronautic Show, where Curtiss – Wright is also holding a Manager's Conference with 42 base managers represented. He is expected back sometime next week and will probably fly back in a new plane for this base.

We have just moved seven planes over to the new field here from Love Field where they had been in storage, and all flying and operations will be done hereafter off this field. Another plane, a Challenger Robin, was ferried down here from

Syracuse, N. Y. and landed late Saturday last, making a total of eight planes at this base now.

The No. 1 Ground School Class having been completely filled, we started a new Ground School Class No. 2, which is held on Monday and Thursday evenings at 8:00 o'clock. K. W. Bourie, J. W. Cantrell and G. E. Sossamon, all of Arlington, Texas, have enrolled in this No. 2 class.

We are moving our temporary offices in the old Rainbo Garden Building into the new hangar next week. The offices are now being laid with heavy battleship grey linoleum, will be ready for occupancy Monday. Plans are now in progress for the Airport opening which will probably be some time in March. Curtiss – Wright Exhibition Corporation is going to put on an aerial show and exhibition for the opening. The planes they use for exhibition date back to the early Wright pushers used in 1909 and up to the present high powered commercial and military planes. The Curtiss Tanager, which won the \$100,000.00 Daniel Guggenheim Safety Contest, will be flown on exhibition.

Friday February 21, 1930

The many friends of Mr. and Mrs. G. H. Gowan have received the sad message of the death of **Mrs. Gowan** who passed away in Fort Worth Monday at noon, at the home of her daughter, Mrs. E. H. Carter. Mr. and Mrs. Gowan lived in Arlington many years and since Mr. Gowan was made almost an invalid three years ago on account of a stroke of paralysis, the children thought best to have their parents where they could have every attention, so moved them away, but their friends here in Arlington still thought of them and kept in close touch, not realizing that Mrs. Gowan would go first. She had a stroke of paralysis and passed away. Her body will be laid to rest in the Bellevue Cemetery her old home town among many friends. Her husband and daughters, Mrs. E. H. Carter, Fort Worth, Mrs. I. G. Thompson, Dallas, Mrs. Cecil of Tampa, Texas, and sons, R. T. and Garrett Gowan survive her.
