

Grand Prairie Genealogical Society Regular Monthly Meeting

Thursday, March 2, 2017, 6:30 pm to 8:30 pm

Grand Prairie Memorial Library
901 Conover Drive, Grand Prairie, TX 75051

Digital Photography for Genealogists by Tony Hanson

Scanners do an outstanding job of creating high quality digital images, but genealogist frequently encounter situations where a scanner is unavailable or unsuitable. This presentation will provide you with a basic understanding of how a digital camera works and a high-level understanding of digital images. Most of the presentation will provide you with simple, practical techniques that you can use to ensure that the pictures of documents you take will be of the highest possible quality using any camera, even the one in your phone. Advances settings, for cameras that support them, will also be discussed.

BIO: Tony has been active in genealogy since 1999. He is active in the Dallas Genealogical Society, having served as webmaster, technology SIG leader, VP of Education and President (his current position). He holds degrees in Electrical Engineering (BS) and Telecommunications (MS) and is an avid amateur photographer.

Guests are always welcome. Meetings, 6:30-9:00 pm, in the Great Room of Grand Prairie Memorial Library, 901 Conover Drive, Grand Prairie, TX.

See <http://gpgstx.org/> for more information on the society.

Thanks,
John H. Tull, Publicity, GPGS
